

# PDF – PRINT TEST

Print this page and measure the solid square to make sure it measures 6" x 6".

When printing PDF files, make sure that

- 1) you check Auto Rotate and Center
- 2) the Page Scaling is set to NONE
- 3) for older versions, the Scale To Fit is NOT checked

If you can not print to scale, you will need to take your printed square to your local copy place and scale it till you get the solid square to come out 6" x 6". Remember the scale you use on the copy machine. You will need that information to print and copy future blocks that will require cutting templates.
